

AMA MARINE PUBLIC COMPANY LIMITED AND SUBSIDIARY
AUDITOR'S REPORT AND INTERIM FINANCIAL STATEMENTS
FOR THE SIX-MONTH PERIODS ENDED JUNE 30, 2021
(UNAUDITED/REVIEWED ONLY)

AUDITOR'S REPORT ON REVIEW OF INTERIM FINANCIAL STATEMENTS

To The Shareholders of AMA MARINE PUBLIC COMPANY LIMITED

I have reviewed the consolidated and separate statements of financial position of AMA MARINE PUBLIC COMPANY LIMITED AND SUBSIDIARY and of AMA MARINE PUBLIC COMPANY LIMITED as at June 30, 2021, and the related consolidated and separate statements of comprehensive income for the three-month and six-month periods ended June 30, 2021, consolidated and separate statements of changes in shareholders' equity, and consolidated and separate statements of cash flows for the six-month periods then ended and the summary of significant accounting policies and other notes. The Company's management is responsible for the preparation and presentation of these interim financial statements, in all material respects, in accordance with Thai Financial Reporting Standards. My responsibility is to express a conclusion on these interim financial statements based on my reviews.

Scope of Review

I conducted my review in accordance with Thai Standard on Review Engagements No. 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A review of interim financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Thai Standards on Auditing and consequently does not enable me to obtain assurance that I would become aware of all significant matters that might be identified in an audit. Accordingly, I do not express an audit opinion on these reviewed interim financial statements.

Conclusion

Based on my review, nothing has come to my attention that causes me to believe that the interim consolidated and separate financial statements are not presented fairly, in all material respects, the consolidated and separate financial positions of AMA MARINE PUBLIC COMPANY LIMITED AND SUBSIDIARY and of AMA MARINE PUBLIC COMPANY LIMITED as at June 30, 2021 and the results of consolidated and separate operations for the three-month and six-month periods ended June 30, 2021, and consolidated and separate cash flows for the six-month periods then ended in accordance with Thai Financial Reporting Standards.

D I A International Audit Co., Ltd.

(Mrs. Suvimol Chrityakierne)

C.P.A. (Thailand)

Registration No. 2982

AMA MARINE PUBLIC COMPANY LIMITED AND SUBSIDIARY

NOTES TO INTERIM FINANCIAL STATEMENTS

FOR THE SIX-MONTH PERIODS ENDED JUNE 30, 2021

(UNAUDITED/REVIEWED ONLY)

1. General information

- Registration : The Company was registered as a company limited under Thai Law on May 10, 1996 and converted to be a public company limited on May 18, 2016 with registration No. 0107559000231.
- Location : At 33/4, The Nine Tower A, 33 floor, TNA02, TNA03 room, RAMA IX Road, Huaykwang, Bangkok 10310.
- Type of business : The Group's business is to transport of goods, the Company engaged in business of marine transportation and subsidiary engaged in logistic business.

2. Preparation and presentation of financial statements basis

2.1 Financial statements preparation basis

The Group's financial statements have been prepared in accordance with Thai Financial Reporting Standards (TFRS); guidelines promulgated by the Federation of Accounting Professions (FAP) and the regulation of The Stock Exchange of Thailand (SET) dated October 2, 2017 regarding the preparation and submission of financial statements and reports for the financial performance of the listed companies B.E. 2560. The format of presentation of the financial statements is not significantly different from the Notification of the Department of Business Development regarding the condensed form should be included in the financial statements (No. 3) B.E. 2562 dated December 26, 2019.

The financial statements have been prepared under the historical cost convention, except as transaction disclosed in related accounting policy.

2.2 Financial reporting standards that became effective in the current period

During the periods, the Group has adopted the revised financial reporting standards and interpretations which are effective for the financial statements for the period beginning on or after January 1, 2021. These financial reporting standards were aimed at alignment with the corresponding International Financial Reporting Standards.

Major changing and revising are as the follows;

- Amendments to references to the Conceptual Framework in Financial Reporting Standards
- Definition of business
- Definition of material and
- Interest Rate Benchmark Reform

The adoption of these financial reporting standards does not have any significant impact on the Group's financial statements.

Handwritten signature in blue ink.

2.3 Financial reporting standards that will become effective for fiscal year beginning on or after January 1, 2022

The Federation of Accounting Professions issued a number of revised financial reporting standards, which are effective for fiscal years beginning on or after January 1, 2022. These financial reporting standards were aimed at alignment with the corresponding International Financial Reporting Standards with most of the changes directed towards clarifying accounting treatment and, for some standards, providing temporary reliefs or temporary exemptions for users.

The management of the Group is currently in process of evaluating the plan to be executed and considering the impact of these standards on the financial statements in the year when they are adopted.

2.4 Coronavirus disease 2019 (COVID-19) Pandemic

In the current, there is Coronavirus disease (COVID-19) pandemic which affected the Company's business since many countries have been placed on lockdown, as a result, the volume of ocean freight vessels increased. Therefore, resulting in the competition in the shipping costs. From the uncertainty situation in 2020, the Company therefore, prepared the financial statements for the year ended December 31, 2020 by adopting in accordance with the Accounting Treatment Guidance on "Temporary relief measures on accounting alternatives in response to the impact of the COVID-19 situation" regarding Forward-looking information was not taken into account when determining expected credit losses, not to consider the COVID-19 situation as an indication for impairment of assets. Because of the accounting guidance already expired on December 31, 2020, the Company has assessed the impact and there was no significant impact on the financial statements.

3. Consolidated financial statements preparation basis

- 3.1 These financial statements have been consolidated by including the financial statements of subsidiary in which AMA Marine Public Company Limited has a power to control such company. Balances and transactions between the Company and subsidiary have been eliminated from the consolidated financial statements. The financial statements of subsidiary were taken into consolidation since the controllable date.
- 3.2 Investment between AMA Marine Public Company Limited and subsidiary have been eliminated under equity method as if the Company owns 100 per cent shareholding in that subsidiary, and the interest of other shareholders is shown as "Non-controlling interests".
- 3.3 These consolidated financial statements have been presented the consolidated financial position and results of operations of AMA Marine Public Company Limited and subsidiary. The usefulness of transaction of consolidated financial statements for other purposes may be limited due to the difference of those consolidated companies.
- 3.4 The consolidated financial statements have been prepared by including the financial statements of AMA Marine Public Company Limited and subsidiary which has shareholding in subsidiary as follows :

	Percentage of holding		Type of business	Relationship
	June 30, 2021	December 31, 2020		
AMA Logistic Co., Ltd.	99.99	99.99	Logistic	Subsidiary

[Handwritten signature]

Business combinations

The Company applies the acquisition method for all business combinations when control is transferred to the Group other than those with entities under common control.

Goodwill is measured as the fair value of the consideration transferred including the recognized amount of any non-controlling interest in the acquire, less the net recognized amount (generally fair value) of the identifiable assets acquired and liabilities assumed, all measured as of the acquisition date.

Consideration transferred includes the fair values of the assets transferred, liabilities incurred by the Group/Company to the previous owners of the acquire, and equity interests issued by the Group/Company. Consideration transferred also includes the fair value of any contingent consideration.

Subsidiaries

Subsidiaries are entities controlled by the Company. The Company controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The financial statements of subsidiaries are included in the consolidated financial statements from the date on which control commences until the date on which control ceases.

Loss of control

When the Company loses control over a subsidiary, it derecognizes the assets and liabilities of the subsidiary, and any related non-controlling interests and other components of equity. Any resulting gain or loss is recognized in profit or loss. Any interest retained in the former subsidiary is measured at fair value when control is lost.

4. Summary of significant accounting policy

4.1 Revenues and expenses recognition

4.1.1 Revenues from services, the Group satisfies a performance obligation comprise :

- Freight charges income is recognized on over time of service rendering based on the stage of completion which is determined as the proportion of the shipment time to the total time required of that particular navigation.
- Revenues from transportation services in a short period are recognized when the services are rendered.

The amounts in which the entity received or entitled from customers but has the performance obligations under contract is presented under the caption of "Contract liabilities" in the statements of financial position which will be recognized as revenues when the obligation under the contract is performed.

4.1.2 Interest income is recognized on an accrual basis by reference to the effective interest rate.

4.1.3 Other income and expenses are recognized on the right to be received and the obligation to be paid.

4.2 Cash and cash equivalents

Cash and cash equivalents included cash on hand, deposit at banks and short-term highly liquid investment with an original maturity is less than three months from the acquisition date and are not subject to restriction on withdrawal.

4.3 Inventories

Inventories comprise fuel and lubricant, materials and supplies of vessels are the stated at the lower of cost on a first-in first-out (FIFO) basis or net realizable value.

4.4 Investment in subsidiary

Investment in subsidiary in the separate financial statements are stated at cost less provision for impairment (if any).

4.5 Investment properties

Investment properties are properties held to earn rental or for capital appreciation or both, is measured at cost less accumulated depreciation and provision for impairment (if any).

Cost is included initial estimate of the costs of dismantling, removing the item and restoring the site on which it is located, the obligation for which the Company incurs. The residual value and the useful life of an asset are required to review at least at the financial year-end. Depreciation is calculated on a straight-line method over the estimated useful lives of the assets for 20 - 40 years. Depreciation of investment properties is included in statements of comprehensive income.

4.6 Property, plant and equipment

Property, plant and equipment are stated at cost which comprises the initial cost of acquisition, costs of dismantling, removing the item and restoring of the assets less accumulated depreciation and provision for impairment (if any).

Parts of an item of property, plant and equipment have different useful lives, they are accounted for each parts of significant separate items.

Depreciation is calculated by the straight-line method over their estimated useful lives of assets. Depreciation for buildings and factories, vessels and vehicles is calculated net of residual value. The estimated useful lives are as follows :-

Building and plant	27 years
Vessels	10-23 years
Dry-dock and special survey expenses	2-3 years
Truck and components	8-10 years
Machinery	12 years
Prefabricated office	10 years
Leased office improvement	10 years
Vessels equipment	5 years
Office tools and equipment	5 years
Vehicles	5 years

[Handwritten signature]

Where the carrying amount of an asset is greater than its estimated recoverable amount, it is written down immediately to its recoverable amount. Estimated recoverable amount is the higher of the anticipated discounted cash flows from the continuing use of the asset and the amount obtainable from the sale of the asset less any costs of disposal.

Major repair and maintenance costs are an expenditure incurred during inspections and major repairs of the vessels. Major repair and maintenance costs are recognized in the carrying amount of other assets and are amortized over the period until the next scheduled dry-docking, up to a maximum of 2-3 years. When significant specific dry-docking costs are incurred prior to the expiry of the amortization periods, the remaining costs of the previous dry-docking are written off immediately.

Depreciation methods, useful lives, and residual values are reviewed at each financial year-end and adjusted, if appropriate.

Any gain or loss arising on disposal of property, plant and equipment are difference of net consideration from disposal and the carrying amount of the property, plant and equipment are recognized in other income or administrative expenses in statements of comprehensive income.

4.7 Other intangible assets

Intangible assets which have finite useful lives are stated at cost less accumulated amortization and provision for impairment (if any) which will be amortized on a straight-line basis as following :

Computer software	5-10 years
-------------------	------------

Intangible assets which have indefinite useful lives are stated at cost less provision for impairment (if any).

4.8 Impairment of non-financial assets

Assets are considered as being impaired whenever events or changes indicated that the carrying amount of such assets exceeds their net recoverable value (net selling price of the assets under current operation or its utilization value whichever is higher). This impairment loss is estimated for each item or each generating cash flows unit of assets, whenever is practical. In the event that the carrying amount of an asset exceeds its net recoverable value, the Company will recognize an impairment loss in the statements of comprehensive income. The Company will reverse the impairment loss whenever there is an indication the underlying asset are no longer impaired or the impairment is declining.

4.9 Translation of foreign currency financial statements

The main change of this accounting standard is to provide guidance of reporting currency in form of the currency of the primary economic environment in which the entity operates. Therefore, the entity is required to determine its functional currency and translate currency used for foreign operations and report the effects of such translation.

The Group operates in a USD environment, with purchases and sales predominantly quoted and settled in USD. Accordingly, the management determines that USD is the functional currency of Group's vessel operating entities whilst Thai Baht is the presentation currency of the Group.

This accounting standard requires all transactions to be initially recorded in the functional currency, USD. All transactions that are not denominated in USD are foreign currency transactions and :

1. Exchange differences arising on translation generally are recognized in profit or loss.
2. Exchange differences arising from translation of functional currency to presentation currency are recognized in other comprehensive income, other components of shareholders' equity. In general, when the Thai Baht presentation currency appreciates against the USD functional currency, the carrying amount of assets, liabilities and the exchange differences on translation of financial statements in equity is likely to reduce. Conversely, when the Thai Baht depreciates against the USD, the carrying amount of assets, liabilities and the exchange differences on translation of financial statements in equity is likely to increase.

Foreign currency transactions are translated into functional currency at the exchange rates ruling on the transaction dates. Monetary assets and liabilities denominated in foreign currency remaining at the statement of financial position date are translated into functional currency at the exchange rate ruling on the statement of financial position date. Gains and losses arising from the settlement of foreign currency transactions and from the translation of monetary assets and liabilities denominated in foreign currencies are recognized in the statement of income in the period in which they are incurred.

However, to comply with the financial reporting requirements of the Stock Exchange of Thailand and the Department of Business Development, the Group presents the consolidated financial statements by translating from US Dollar to Thai Baht. The assets and liabilities are translated into Thai Baht using the average buying and selling rates determined by a commercial bank at period-end, whereas the statement of income is translated using average exchange rates during the period. Differences from such translations have been presented in other comprehensive income.

4.10 Leases

At inception of contract, the Company assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

The Company applied a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. At the commencement date of the lease (i.e. the date the underlying asset is available for use), the Company recognises right-of-use assets representing the right to use underlying assets and lease liabilities based on lease payments.

Group as a lessee

Right-of-use assets

Right-of-use assets are recognized at the commencement date of the lease. Right-of-use assets are stated at cost, less any accumulated depreciation and provision for impairment (if any), and adjusted for any remeasurement of lease liabilities (if any). The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date, less any lease incentives received.

Depreciation of right-of-use assets are calculated by reference to their costs on a straight-line basis over the shorter of the lease term and the estimated useful lives for each of right-of-use assets, as follows:

Office buildings

5 years

[Handwritten signature]

If ownership of the leased asset transfers to the Company at the end of the lease term or the cost of such asset reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

Lease liabilities

At the commencement date of the lease, the Group recognize lease liabilities measured at the of the lease payments to be made over the lease term, discounted by the interest rate implicit in the lease present value or the Company incremental borrowing rate. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification or reassessment.

Short-term leases and Leases of low - value assets

Payments under leases that, have a lease term of 12 months or less at the commencement date, or are leases of low - value assets, are recognised as expenses on a straight-line basis over the lease term.

4.11 Financial instruments

The Group initially measures financial assets at its fair value plus, in the case of financial assets that are not measured at fair value through profit or loss, transaction costs. However, trade receivables, that do not contain a significant financing component are measured at the transaction price as disclosed in the accounting policy relating to revenue recognition.

Classification and measurement of financial assets

Financial assets are classified, at initial recognition, as to be subsequently measured at amortised cost, fair value through other comprehensive income ("FVTOCI"), or fair value through profit or loss ("FVTPL"). The classification of financial assets at initial recognition is driven by the Group's business model for managing the financial assets and the contractual cash flows characteristics of the financial assets.

Financial assets at amortised cost

The Group measures all financial assets except for derivatives at amortised cost if the financial asset is held in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at amortised cost are subsequently measured using the effective interest rate ("EIR") method and are subject to impairment. Gains and losses are recognised in profit or loss when the asset is derecognised, modified or impaired.

[Handwritten signature]

Classification and measurement of financial liabilities

Except for derivative liabilities, at initial recognition the Group's financial liabilities are recognised at fair value net of transaction costs and classified as liabilities to be subsequently measured at amortised cost except for derivatives using the effective interest rate (EIR) method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process. In determining amortised cost, the Group takes into account any fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance costs in profit or loss.

Derivatives

The Company uses foreign currency and interest rate swap contracts as a derivative to manage its exchange rate and interest rate risks.

Derivatives are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at fair value. The subsequent changes are recognised in profit or loss. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

Derecognition of financial instruments

A financial asset is primarily derecognised when the rights to receive cash flows from the asset have expired or have been transferred and either the Group has transferred substantially all the risks and rewards of the asset, or the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

Impairment of financial assets

The Group recognises an allowance for expected credit losses ("ECLs") for all debt instruments not held at FVTPL. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12-months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure (a lifetime ECL).

For trade receivables and contract assets, the Group applies a simplified approach in calculating ECLs. Therefore, the Group does not track changes in credit risk, but instead recognises a loss allowance based on lifetime ECLs at each reporting date. It is based on its historical credit loss experience and adjusted for forward-looking factors specific to the debtors and the economic environment.

A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the consolidated statement of financial position if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

4.12 Income tax expenses and deferred tax

Income tax expenses for the accounting period comprises current tax and deferred tax.

4.12.1 Current tax

Current tax (if any) is calculated from the annual profit to be paid, using tax rates enacted, and any related taxable adjustment are recognized as expenses in statements of income. In addition, the Company complied with the notification of the Director-General of Revenue Department on Income tax (No.72) prescribing rules, procedures and conditions for the purpose of exemption from income tax of juristic companies or partnership in respect of revenues arising from the international carriage of goods by sea.

Subsidiary recorded income tax in the accounts at the amount expected to be paid to the taxation authorities, based on taxable profits determined in accordance with tax legislation.

4.12.2 Deferred tax

Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they adjust, using tax rates enacted or substantively enacted at the reporting date.

Deferred tax liabilities are recognized for all taxable temporary differences. Deferred tax assets are recognized for all deductible temporary differences and carry forward of unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax losses can be utilized.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that tax asset it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred to be utilized.

Deferred tax is recognized directly to shareholders' equity, except to the extent that it relates to items recognized in other comprehensive income or directly in equity.

4.13 Basic earnings per share

Earnings per share as presented in the statements of comprehensive income is the basic earnings per share which is determined by dividing profit (loss) for the period by the weighted average number of common shares issued and paid-up during the year.

4.14 Provisions

The Group recognize a provision when an entity has a present legal or constructive obligation as a result of a past event. It is probable that an outflow of economic benefits resources will be required to settle the obligation and reliable estimate can be made of the amount of the obligation. If some or all the expenditure is required to settle a provision, is expected to be reimbursed when it is virtually certain that reimbursement will be received if the Company settles the obligation. The amount recognized should not exceed the amount of the provisions.

4.15 Employee benefits

4.15.1 Provident fund

The Group has established provident fund under the defined contribution plan. The fund's assets are separated entities which are administered by the outsider fund manager. The Company and employees made contribution into such provident fund. The Company's contribution payments to the provident fund were recorded as expenses in statements of comprehensive income in the period in which they are incurred.

4.15.2 Employee benefits

The Group provide for post-employment benefits, payable to employees under the Thai Labor Law. The present value of employee benefit liabilities recognized in the statements of financial position is estimated on an actuarial basis using Projected Unit Credit Method of which calculated by the Independent Actuary by using Actuarial Technique. The calculation was made from determining the present value of future cash flows expected to be required to settle and determines discount rate by reference to market yield of government bonds should have terms to maturity approximately equal to the terms of such obligations. In determine the future cash flows expected to be required to settle is used from employees' salaries, turnover, length of services and other factors. Changes in actuarial gains or losses are recognized in the period in which they are incurred in other comprehensive income. Expenses related to employee benefits shall be recorded in profit or loss for sharing such costs throughout the period of services rendering.

4.16 Transactions with related parties

Enterprises and individuals that directly, or indirectly through one or more intermediaries, control, or are controlled by, or are under common control with the Company.

Associates and individuals owning, directly or indirectly, an interest in the voting power of the Company that gives them significant influence over the enterprise, key management personnel, including directors and officers of the Company which having authority and responsibility for planning and controlling the activities of the Company.

4.17 Significant accounting judgements and estimates

The preparation of financial statements in conformity with Thai Financial Reporting Standards at times requires management to make subjective judgements and estimates regarding matters that are inherently uncertain. These judgements and estimates affect reported amounts and disclosures and actual results could differ from these estimates. Significant judgements and estimates are as follows:

Determining the lease term of contracts with renewal and termination options

The Group determine the lease term as the non-cancellable term of the lease, together with any period covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised. The management is required to use judgment in evaluating whether it is reasonably certain whether or not to exercise the option to renew or terminate the lease, considering all relevant factors that create an economic incentive to exercise either the renewal or termination. After the commencement date, the Group reassesses the lease term if there is a significant event or change in circumstances that is with its control and affects to reasonably certain to be exercised.

Allowance for expected credit losses of trade receivables and contract assets

In determining an allowance for expected credit losses of trade receivables and contract assets, the management needs to make judgement and estimates based upon, among other things, past collection history, aging profile of outstanding debts and the forecast economic condition for groupings of various customer segments with similar credit risks. The Group's historical credit loss experience and forecast economic conditions may also not be representative of whether a customer will actually default in the future.

Depreciation of property, plant and equipment and right-of-use assets and amortisation of intangible assets

In determining depreciation of plant and equipment and right-of-use assets and amortisation of intangible assets, the management is required to make estimates of the useful lives and residual values (if any) of the Company's plant and equipment and intangible assets and to review estimate useful lives and residual values when there are any changes. In addition, the management is required to review property, plant and equipment, right-of-use assets and intangible assets for impairment on a periodical basis and record impairment losses when it is determined that their recoverable amount is lower than the carrying amount. This requires judgements regarding forecast of future revenues and expenses relating to the assets subject to the review.

Deferred tax assets

Deferred tax assets are recognized for deductible temporary differences and unused tax losses to the extent that it is probable that taxable profit will be available against which the temporary differences and losses can be utilized. Significant management judgment is required to determine the amount of deferred tax assets that can be recognized.

Post-employment benefits under defined benefit plans

The obligation under the defined benefit plan is determined based on actuarial techniques. Such determination is made based on various assumptions, including discount rate, future salary increase rate, mortality rate and staff turnover rate.

4.18 Measurement of fair values

A number of the Group's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities.

The Group have an established control framework with respect to the measurement of fair values. This includes a valuation team that has overall responsibility for overseeing all significant fair value measurements, including level 3 fair values, and reports directly to CFO.

The valuation team regularly reviews significant unobservable inputs and valuation adjustments. If third party information, such as broker quotes or pricing services, is used to measure fair values, then the valuation team assesses the evidence obtained from the third parties to support the conclusion that such valuations meet the requirements of TFRS, including the level in the fair value hierarchy in which such valuation should be classified.

Fair values are categorized into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows :

- Level 1 : quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date.
- Level 2 : inputs other than quoted prices included in Level 1 that are observable for the asset or liabilities, either directly (i.e. as prices) or indirectly (i.e. observable prices).
- Level 3 : inputs are unobservable for the asset or liability.

If the inputs used to measure the fair value of an asset or liability might be categorized in different levels of the fair value hierarchy, then the fair value measurement is categorized in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Group recognized transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

5. Transactions with related persons and parties

5.1 The relationship and pricing policies

The relationship and pricing policies among the Company, subsidiary, related persons and parties are as follows:

Item	Persons and parties	Relationship	Transactions	Pricing policy
1.	AMA Logistic Co., Ltd.	Subsidiary	Office rental Loans	As indicated in agreement Promissory notes, matured on demand at call at the interest of 6% per annum
2.	PTG Energy Public Company Limited	Common directors and shareholders with a major shareholder of the Company	Hire of transportation income Purchase of oil	As indicated in agreement Based on the normal course of business
3.	Petroleum Thai Corporation Co., Ltd.	"	Hire of transportation income Purchase of oil Office rental	As indicated in agreement Based on the normal course of business As indicated in agreement
4.	Empire Oil Co., Ltd.	"	Purchase of oil	Based on the normal course of business
5.	Pyramid Oil Co., Ltd.	"	Hire of transportation income	As indicated in agreement
6.	Olympus Oil Co., Ltd.	"	Hire of transportation income	As indicated in agreement
7.	Onelink Network Co., Ltd.	** Common directors with the Company	Distribution of GPS accessories	Based on the normal course of business
8.	PPP Green Complex Co., Ltd.	Common directors with the Company	Hire of transportation income	As indicated in agreement

** On February 25, 2021, the director of the Company has resigned from taking a director position of One Link Network Co., Ltd.

The Group adjusted the fair value of forward contracts and interest rate swap through profit and loss

The Group has significant derivatives as follows :

Cross currency interest rate swap contracts

The Company entered into two cross currency interest rate swap contracts with a financial institution totaling Baht 215.69 million to swap from US Dollar to Thai Baht at an exchange rate as specified in the contracts and to swap the fixed interest rate to a float interest rate. The contracts are effective from July 1, 2021 to January 31, 2025.

The above cross currency interest rate swap contracts will be swapped the interest every ended of month from the effective date until the maturity date and will recognise the transactions as derivatives in the financial statements over the period of contracts.

Commodity derivative contracts

The Company has entered into an issue of Crack Spread Swap Contracts in the amount of USD 150,000 to swap the spread of the average benchmark price of crude oil of the settlement months to the fixed price. As at June 30, 2021, the Company has the outstanding balances of oil under such contracts totally 500 metrictons.

Foreign currency forward contracts

Forward exchange rate contracts were made for exchange rate hedging for the future purchasing by entering into the contract to exchange USD currency into Thai Baht for USD 4,100,000.00 which matured to be used during June 30, 2021 to September 30, 2021.

The nominal amounts and fair values of forward exchange rate contracts, interest rate swap forward contract and crude oil futures exchange contracts as at June 30, 2021 and December 31, 2020 are as follows:

	Consolidated and Separate financial statements (Baht)			
	Nominal amounts**		Fair values*	
	June 30, 2021	December 31, 2020	June 30, 2021	December 31, 2020
Foreign currency and interest rate swap contracts	215,693,720.62	268,919,860.11	214,139,246.04	286,100,449.86
Forward contracts	126,128,531.00	0.00	131,261,639.06	0.00
Commodity derivative contracts	7,177,297.50	0.00	8,091,346.08	0.00
Total	348,999,549.12	268,919,860.11	353,492,231.18	286,100,449.86

* The fair value of forward contracts is the adjusted value of the original contracts which the Company entered with the commercial banks with the market price. At the end of the reporting period in order to reflect the current value of the contracts.

** The nominal amount of forward contracts is the value of the original contracts which the Company entered with the commercial banks and must be repaid at the maturity date.

29.2 Financial risk management objectives

The Group's financial instruments, as defined under Thai Financial Reporting Standards No. 7 "Financial Instruments: Disclosure", principally comprise cash and cash equivalents, trade and other current receivables, fixed deposit with obligations, trade and other current payables, lease liabilities and long-term borrowings from financial institutions. The Group exposed to financial risks associated with these financial instruments and how they are managed is described below.

29.2.1 Credit risk

Credit risk is the potential financial loss resulting from the failure of a customer or a counterparty to settle its financial and contractual obligations to the Group when they fall due.

Management has a credit policy in place and the exposure to credit risk is monitored on an ongoing basis. Credit evaluations are performed on all customers requiring credit over a certain amount. At the end of the reporting period there were no significant concentrations of credit risk.

29.2.2 Liquidity risk

The Group monitors the risk of a shortage of liquidity position by a recurring liquidity planning and maintains an adequate level of cash and unused committed and uncommitted credit lines with various banks to meet its liquidity requirements.

The Group has raising of internal and external credit lines to cover the liquidity needs, subject to guidance by the Group.

The table below summarises the maturity profile of the Group's financial liabilities instruments as at June 30, 2021 based on contractual undiscounted cash flows:

	Consolidated financial statements (Million Baht)		
	Within	Over 1 year	Total
	1 year	to 5 years	
Financial liabilities			
Short-term borrowings from financial institutions	49.77	0.00	49.77
Trade and other current payables	122.78	0.00	122.78
Lease liabilities	215.98	416.17	632.15
Long-term borrowings from financial institutions	302.91	195.00	497.91
Total	691.44	611.17	1,302.61

	Separate financial statements (Million Baht)		
	Within	Over 1 year	Total

Trade and other current payables	90.55	0.00	90.55
Lease liabilities	3.02	3.99	7.01
Long-term borrowings from financial institutions	302.91	195.00	497.91
Total	446.25	198.99	645.24

[Handwritten signature]

29.2.3 Interest rate risk

The interest rate risk is a result of future fluctuation in market interest rates that will affect the results of the Group's operation and their cash flows. However, caused by the Company's assets which had material interest and borrowings mostly charged interest at the fixed rate, therefore, the Company is not exposed to the risk from fluctuation of such interest rate.

Significant financial assets and financial liabilities as at June 30, 2021 can be classified by interest rate and separated on maturity date as follows:

	Consolidated financial statements (Million Baht)					
	Fixed interest rate		Floating interest rate	Non-interest bearing	Total	Effective interest rate (% per annum)
	Within 1 year	Over 1 year to 5 years				
Financial assets						
Cash and cash equivalents	93.37	0.00	0.00	1.13	94.50	0.01 - 0.25

Total	228.56	174.76	151.37	0.00	554.69	

[Handwritten signature]

29.2.4 Foreign currency risk

The Company has a functional currency denominated in US Dollar and the Company also has revenues and costs of shipment business in US Dollar as well, therefore, it is a regular hedging of exchange rate risks to a certain extent. However, the Group's management has decided to maintain an open position with regard to this exposure but endeavors to limit this exposure to the minimum possible amounts by not holding significant amounts of financial instruments denominated in other currencies or use derivative instruments, as and when it considers appropriate, to manage such risks.

The Group's exposure to the foreign currency risk relates primarily to long-term loans. When a derivative is entered into for the purpose of being a hedge, the Group negotiates the terms of the derivative to match the terms of the hedged exposure. The Group does not use foreign currency forward contracts or purchased currency options for trading purposes.

The Group has the following significant financial liabilities denominated in foreign currencies (currencies other than US Dollars which is the Group's functional currency).

	Consolidated and Separate financial statements			
	Financial liabilities		Average exchange rate	
	June	December	June	December
	30, 2021	31, 2020	30, 2021	31, 2020
			(USD per 1 foreign currency unit)	
Foreign currency	(Million)	(Million)		
Baht loan	226.84	282.54	0.0312	0.0333

29.2.5 Commodity price risk

The Group is exposed to fluctuation of fuel price, shipping and carriage, whereby the Group hedges the risk from contracts with suppliers that the transportation rate can be fluctuate due to oil costs as well as the Group has planned to make pre-order in a short period of 1-3 months.

29.3 Fair value of financial instruments

Since the majority of the Group's financial instruments are short-term in nature or carrying interest at the rate close to the market interest rates, therefore, the Group assessed their fair value are closed to their carrying value as presented in the statements of financial position.

[Handwritten signature]

29.3 Fair value of financial instruments (cont'd)

Fair value hierarchy

As at June 30, 2021 and December 31, 2020, the Group has assets and liabilities that are measured at fair value or fair value are disclosed. Classified by fair value hierarchy as follows :-

Consolidated and Separate financial statements (Baht)				
As at 30 June 2021				
	Level 1	Level 2	Level 3	Total
Financial assets measured at fair value				
Current derivative assets				
- Commodity derivative contracts	0.00	946,809.12	0.00	946,809.12
Total current derivative assets	0.00	946,809.12	0.00	946,809.12
Total current derivative assets	0.00	946,809.12	0.00	946,809.12
Financial liabilities measured at fair value				
Current derivative liabilities				
- foreign currency and interest rate swap contracts	0.00	5,317,084.52	0.00	5,317,084.52
- Foreign currency forward contracts	0.00	768,411.80	0.00	768,411.80
Total current derivative liabilities	0.00	6,085,496.32	0.00	6,085,496.32
Non-current derivative financial liabilities				
- foreign currency and interest rate swap contracts	0.00	786,062.77	0.00	786,062.77
Total non-current derivative financial liabilities	0.00	786,062.77	0.00	786,062.77
Total derivative financial liabilities	0.00	6,871,559.09	0.00	6,871,559.09

Consolidated and Separate financial statements (Baht)				
As at 31 December 2020				
	Level 1	Level 2	Level 3	Total
Financial assets measured at fair value				
Current derivative assets				
- foreign currency and interest rate swap contracts	0.00	6,809,666.73	0.00	6,809,666.73
Non-current derivative assets				
- foreign currency and interest rate swap contracts	0.00	10,370,923.02	0.00	10,370,923.02
Total derivative assets	0.00	17,180,589.75	0.00	17,180,589.75

The methods and assumptions used by the Group in estimating the fair value of financial instruments are as follows:

- 1) Derivatives their fair value has been determined by using a discounted future cash flow model and a valuation model technique. Most of the inputs used for the valuation are observable in the relevant market, for example, spot rates of foreign currencies and forward exchange rate of foreign currency.
